---

On August 21, 2020, Idaho Power Company (“Company”) applied to the Commission for approval to increase the collection percentage of the Energy Efficiency Rider (“Rider”), outlined in tariff Schedule 91. If approved, the Company’s proposed changes would take effect January 1, 2021.

The Commission now provides notice of the Application and sets a deadline for interested persons to intervene.

**NOTICE OF APPLICATION**

YOU ARE HEREBY NOTIFIED that the Company proposes to increase the Rider percentage from 2.75 percent to 3.10 percent. The Company explains this percentage change is intended to closely match the Company’s request in Case No. IPC-E-20-32 “to remove the revenue requirement associated with the Boardman coal-fired plant scheduled to cease operations at the end of 2020.” Application at 3.

YOU ARE FURTHER NOTIFIED that the Rider was created by the Commission in Order No. 29026 to fund demand-side management (“DSM”) programs and is set as a percentage of the Company’s base rate revenues. *See* Order No. 34345.

YOU ARE FURTHER NOTIFIED that if the Company’s Application is approved as filed, the Company’s current billed revenue would increase by \$3.7 million (0.31 percent). The Company notes that the average residential customer using 950 kilowatts per month would see approximately a \$0.29 increase in their monthly bill.

YOU ARE FURTHER NOTIFIED that if the Company’s concurrent application in Case No. IPC-E-20-32 (to remove the revenue requirement associated with Boardman) is also

approved as filed, the Company asserts the combined impact of the two cases would be a net *decrease* of \$314,922 in billed revenue—a 0.03 percent reduction. The Company also states that if the Commission were to approve this Application and the one in Case No. IPC-E-20-32, the average residential customer’s monthly bill would decrease by a \$0.02.

YOU ARE FURTHER NOTIFIED that the Company requests its Application be processed under Modified Procedure and that the proposed changes take effect January 1, 2021.
